LDK Consultants

August 2008

ENERinTOWN project completed by LDK Consultants

LDK Consultants successfully completed the project: **“Monitoring and Control of Energy Consumption in Municipal Public Buildings over the Internet, ENERinTOWN”**.

The **ENERinTOWN** initiative is a part of the EU Programme “Intelligent Energy for Europe” and was materialised by an international joint venture consisting of ten organisations throughout different EU Member States.

The project aimed at the elimination of two negative non-construction-linked characteristics related to public buildings management:

- the inability for continuous and sufficient energy building behaviour monitoring, and
- the deficiencies of technical staff in charge of energy monitoring and the application of particular energy saving measures

ENERinTOWN pilot application in Greece was completed with the cooperation of the municipalities of **Maroussi** and **Egaleo**. The selected municipal buildings that participated in the project included schools, municipal sport centres (swimming pools) and a city hall. Main actions include:

- (1) the installation of an integrated monitoring system for continuous observation through internet,
- (2) the lay out for the definition of the specifications for an Energy Manager service for the municipal buildings, and
- (3) the edition of a specific guide, providing terms and procedures for the provision of energy efficient equipment to the Municipal authorities.

The completion of **ENERinTOWN** coincides with the enactment of energy certification principles for large buildings according to **National Law 3361/2008**: “Measures for the reduction of energy consumption in buildings and other provisions”, harmonising national legislation with the **Directive 2002/91/EC** on the Energy Performance of Buildings, as well as with the **Joint Ministerial Decision D6/B/14826/17-06-2008**: “Measures for the improvement of energy efficiency and energy saving in the public sector”.

Further information on the materialisation, applications and results of the **ENERinTOWN** project can be obtained at www.enerintown.org or by the official contact in Greece: LDK Consultants, Engineers & Planners Ltd. – Energy Department, Tel: +30-2108196700, Fax: +30-2108196709, Email: ene@ldk.gr.
