

PRESS RELEASE

LDK Consultants

September 2008

Project completion for the Austrian Federal Economic Chamber

LDK Consultants and **ENVIROPLAN** completed a project assigned by the **Austrian Federal Economic Chamber** and the Commercial Department of the Austrian Embassy in Greece on the Greek Environmental and Energy Market. The project outcome was presented during two one-day conferences in Austria last week.

The project reported on the existing status, the potential and the future perspectives of the two market sectors, focusing on the opportunities for cooperation between Greek and Austria enterprises. In respect to the Greek Environmental Market, the study presented a thorough analysis on solid waste and wastewater management, as well as on air emissions and ambient air quality issues. In the Energy sector, a detailed picture was given on the electric power market, the renewable energy sources, the use of biofuels, as well as on the natural gas market in Greece.

The project was completed by two presentations in Austria on September 23rd and 24th, in the framework of two one-day conferences organized by the **Austrian Federal Economic Chamber** for the promotion of environmental technology and alternative energy sources originating from Austria to Mediterranean countries. *Mr Stavros Damianidis*, Head of Environment Department of **LDK Consultants**, *Mr Konstantinos Nikolopoulos*, Environmental Engineer at **LDK Consultants**, and *Mr George Lolos*, President and Managing Director of **ENVIROPLAN**, presented the project reports at the conferences. The conferences were attended by executives of the Austrian Federal Economic Chamber and of Austrian enterprises active in the energy and environmental market.
