

PRESS RELEASE

LDK Consultants

January 2010

LDK Consultants participated successfully at the World Future Energy & Environment international exhibition in Abu Dhabi, United Arab Emirates

LDK Consultants engineering & consulting group of companies participated successfully at the international exhibition World Future Energy & Environment, which took place parallel to the **World Future Energy Summit** between January 18th and 21st, 2010, at the National Exhibition Centre of Abu Dhabi (ADNEC), in the United Arab Emirates. More than 23,000 people visited the 40,000 sq.m. exhibition premises, whereas more than 3,000 delegates from over 130 countries participated in the summit.

LDK's participation was realised through a business mission for the promotion of Greek enterprises in the region, organised by the **Hellenic Export Promotion Organisation** (HEPO). The mission comprised a total of ten Greek companies. Parallel to the exhibition, the World Future Energy Summit hosted H.E. Mr Karolos Papoulias, President of the Hellenic Republic, as keynote speaker. Following his address to the summit, Mr Papoulias visited the stands of the Greek pavilion, accompanied by the under-secretary of Foreign Affairs, Mr Spiros Kouvelis, and the under-secretary of Environment, Energy & Climate Change, Mr Yannis Maniatis.

LDK successfully presented the services of its building and infrastructure engineering, energy and environment business units, along with the potentials for the provision of integrated horizontal services of these sectors, which provide for the incorporation of energy efficiency, renewable energy sources and environmental protection to the whole range of construction or infrastructure projects.

The successful participation and the impressive number of the exhibition visitors, along with the parallel attendance to the summit, provides **LDK** with a strong potential to further explore the perspectives and at the same consolidate its presence, in the markets of the Arab and Middle East countries.
